## Practical & Modern

Sun Louvre's adjustable shades construction is designed to conform to the modern principle of stylish practicality. The set up comes with chance of manual control level or automated remote controlled shade adjuster.

With a gentle pull of this manual level, once an open-aired area is instantly transformed into shaded area of your liking.

And at simple touch of the button, the Louvre rotates up to 90 degrees, allowing users to adjust the level of sun light streaming in, shield the area from the wind, or create shades as desired before sealing closed for privacy and rain protection. When closed the louvre inter-lock tightly to form a sturdy roof

Contemporary Living Presents it self with the abundance of flexibility for choice. having options to decide on desired thing is no longer a luxury but a feature that most people adhere to, as the basic principle of their lifestyle. Inspired by this flexible concept, the superbly engineered Sun Louvre offers prestige living with an array of abundant suppleness for shades.

Sun Louvre roof system delivers full control of sun, shade, light, heat, wind and ventilation over the enclosed area beneath. You can determine the desired amount of sunlight and solar radiation for the particular area underneath. The system also leaves air circulation over enclosed spaces undisturbed.

With Sun Louvre, you are guaranteed the peace of mind of knowing that multifunctional shades provide not only comfort and protection but style and substance combined
